CONTRACTS AND GRANTS

Grants (Funded)

Active/Ongoing Projects

2023- National Science Foundation (NSF), DGE Research Traineeship (NRT), NRT: Alabama Collaborative for Contemporary Education in Precision Timing (ACCEPT), **Role: Co-PI and Lead Evaluator** (\$2,997,970)

This National Science Foundation Research Traineeship (NRT) award, **the Alabama Collaborative for Contemporary Education in Precision Timing (ACCEPT)**, will develop an innovative graduate (MS, PhD) education model responsive to the unique needs for precision timing workforce development. ACCEPT will provide a comprehensive training and educational opportunity for one hundred and sixty (160) MS and PhD students, including twenty-four (24) funded trainees from physics, mathematics, and electrical and computer engineering. Trainees will combine coursework across these three departments with professional development in critical areas identified by precision timing experts (teamwork, leadership, ethics, communication), and put their training into practice via research experiences with ACCEPT partners, student-led initiatives, and networking at conferences and workshops.

2022- National Science Foundation (NSF), DGE Research Traineeship (NRT), NRT: Water-R2O: Research to operations in data-driven hydrologic forecasting and decision making, **Role: Lead Evaluator** (\$2,998,873)

This National Science Foundation Research Traineeship (NRT) award to The University of Alabama addresses the integrated needs of researchers, forecasters, and users of forecasts, by

September 2023

launching a unique hydrologic science program. The **Water-R2O** innovative graduate education program will be co-created with those doing practice in the water prediction community, to generate a pipeline of interdisciplinary scientists and engineers capable of diagnosing water-hazard forecasting needs, designing prediction tools and techniques using latest advances in AI, machine learning, and data science, and disseminating the forecast products in useable form to a wide array of decision makers.

2021- United States Agency for International Development (USAID), Higher Education System Strengthening Activity (HESSA) in Pakistan, University of Utah (University of Alabama), **Role: Co-PI** (\$1,960,474)

The **Higher Education System Strengthening Activity (HESSA)** exists to address Pakistan's mismatch in supply and demand of workforce development. Launched in 2021, the five-year project will increase the employability of the Pakistani workforce through trainings to improve Higher Education graduate capacity, relevance, adequacy, and inclusivity.

2018-2023 NSF S-STEM, MATRIX: MAE Assistance for Transfer Improvement and Excellence, **Role: STEM-Educational Researcher** (\$999,911)

The **Mechanical and Aerospace Engineering Assistance for Transfer Improvement and Excellence (MATRIX)** project provides support to transfer students with demonstrated financial need and academic promise to succeed in STEM disciplines at the University of Alabama in Huntsville (UAH).

Completed Projects

2020 The University of Alabama College of Continuing Studies, Bama By Distance Faculty Research Fellow, Online graduate certificates and the relationship to student learning in degree programs, **Role: PI** (\$15,000)

2015 SEC Travel Grant, Research Symposium at the University of Mississippi School of Education, **Role: Primary Awardee** (\$1,200)

2014 The University of Alabama Center for Community-Based Partnerships Seed Grant, Hale County Health Project, **Role: Evaluator** (\$5,000)

2013 The University of Alabama College of Education Research Grant Program, Workforce development and the emergence of STEM-related credential programs, **Role: PI** (\$2,500)

2009 The University of Alabama Research Grants Committee, Understanding the experiences of first-generation doctoral students, **Role: PI** (\$2,000)

2006 The University of Alabama College of Education Research Grant Program, Interdisciplinarity in the professions: A case study of law and engineering curricula, **Role: PI** (\$2,000)

Advisory Board Membership

- 2018-2022 National Science Foundation, Trajectories into Early Career Research at Utah State University
- 2016-2020 National Science Foundation, NRT-DESE: Data-Enabled Discovery and Design of Energy Materials (D3EM) at Texas A&M University
- 2015-2020 National Science Foundation, Collaborative research: Variation in the awarding and effectiveness of STEM graduate student funding across teaching and research assistantships, fellowships, and traineeships at University of Texas at Austin and Virginia Polytechnic Institute and State University

SERVICE

Professional Service/Projects

- 2021- National Institute of General Medical Sciences (NIGMS) Innovative Programs to Enhance Research Training, Catalyzing the Spread of Evidence-Based Practices in Biomedical Research Training, **Role: Working Group Member and External Evaluator**

The **Professional Development Hub (pd|hub)** is a multi-stakeholder initiative to advance the career and professional development of scientists. The goals are to disseminate career and professional development approaches; build capacity for research and evaluation; connect stakeholders across diverse networks; and advocate for career and professional development.

- 2021 Program Board of the International Transdisciplinarity Conference, 2021

September 2023

Every two years, td-net organizes the **International Transdisciplinarity (ITD) Conference** in cooperation with various partners to promote the exchange of inter- and transdisciplinary teachers and researchers from all over the world. The td-net addresses the concerns of researchers and research funders in the field of inter- and transdisciplinary research and teaching. Since 2008, the td-net has been an initiative of the Swiss Academies of Arts and Sciences.

2019-2020 Organizing Committee for International Doctoral Education Research Network (IDERN) 2020-2021 Meeting

IDERN is an open network bringing together researchers of doctoral education from all over the world to share resources and ideas. The Network aims to broaden and expand the field of research into doctoral education and provide opportunities for researchers to work towards future research collaborations.

2016-2022 NSF Grad-CAREER, Graduate Climate Adaptation Research that Enhances Education and Responsiveness of Science at the Management-Policy Interface, **Role: External Assessment Auditor**

The **Climate Adaptation Sciences** specialization at Utah State University prepares trainees for research-based careers that will integrate science, management, and policy to understand and adapt to a changing climate. The Climate Adaptation Science program closely integrates research, instruction, work-place experience, and collaborations among scientists, federal, state, and local land and resource managers, policy-makers, trainees, and citizen stakeholders. The program emphasizes interdisciplinary research and includes training in informatics, modeling, communication, leadership, project management, risk assessment, decision-making under uncertainty, and interdisciplinary teamwork.
